OBJECTIVE

This Hands-On Training aims to provide opportunity for students to know about the latest trends in Network Design. This program will be very useful to P.G scholars who pursue their carrier in Network Security. Participants will also be provided knowledge about Network Security and Security Issues which will help in their research activities. The main focus of this workshop is to acquire the technical knowledge about security and the sessions are based on B.E 7th semester Security laboratory syllabus of Anna University.

ABOUT THE PROGRAMME

There are many different Networking technologies and Security methods—some are available today, few just now emerging, well-proven and little quite experimental. Cryptography is a key technology for achieving information security in communications, computer systems, electronic commerce, and in the emerging information society.
